DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of the invention of Group III as represented in Fig's 15-21 and claims 8-14 in the reply filed on 9/19/07 is acknowledged. Claims 1-7 are currently withdrawn from consideration at this time.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

'As best understood', recitation of "may" should be deleted to clearly, positively recite the limitation.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3676

5. Claims 8-11 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Pat. No. 5,219,196 to Luker.

Luker '196 teaches Applicant's claim limitations for a latching strike assembly including : a "body" – 9, a "latching strike" – 10, a "bistable detent" – noting that detent 307 of the elected invention is a pin that is spring-biased to one position but may be held in that one position or an opposite position by a solenoid, it is examiner's position that pins 19, 20, 21 of the prior art read on limitation inasmuch as they are biased to one position but may be stably held in an opposite position by "solenoid" – 26. It is examiner's position that voltage applied to the solenoid is a first signal and lack of voltage applied is inherently a second signal.

Allowable Subject Matter

6. Claims 12-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Pat. No. 6,486,726 to Caspi.

U.S. Pat. No. 3,861,727 to Froerup.
